CANVAS TO CANVAS FASTENERS

DETAILS

Post Heights: Single (13mm), Double (16mm)

Colours (Single): Natural, Black, White, Grey

Colours (Double): Natural & Black

The Stayput® Canvas to Canvas models are used to secure roll up panels in auto and marine covers or roll up awnings. They are available as a single or double to accept either one or two #4 eyelets or grommets with an approx 9.5mm inside diameter. The Canvas to Canvas are easily installed into the fabric using the supplied nut through a 6mm (1/4") hole. When used for securing a roll-up opening, a strap with an eyelet installed must be fitted to the inside of the cover during installation. Once the opening is rolled up the strap is looped under the roll and the eyelet secured over the post and tongue on the outside.

A Stayput® Fastener Canvas to Canvas Strap Retainer can be added to the inside behind the nut enabling the strap to be neatly clipped back up out of the way when not in use.
