## SHOCK CORD KNOBS

### NEW Stainless Steel

The New Stayput® Stainless Steel Shock Cord Knob provides a premium look with its polished finish and low 11mm profile. It suits up to a 6mm shock cord and is secured using an 8g countersink screw or suitable rivet.

### Standard & Capped

The **Stayput® Shock Cord Knob with Cap** is our premium nylon Shock Cord Knob. It is the same size as our Standard Stayput® Shock Cord Knob but we have deepened the countersink and added a neatly fitting cap to cover the screw or rivet. The result is an attractive finish with concealed fixing. It has been designed to suit a 3/16" / 4.8mm rivet or 8g countersink screw.

Our Standard **Stayput® Shock Cord Knob** is still the same strong well finished product customers have been enjoying for many years.
